Kaydon **infinite**[®] bearing solutions

Remanufactured Bearings

When the bearings in your construction machinery or other heavy equipment are worn and need replacing, call Kaydon Bearings. We can remanufacture them to like-new condition at big savings — typically 50% less than the price of an OEM bearing.

Kaydon remanufactures some 1,500 slewing ring bearings each year for cranes, shovels, excavators, and other big machinery. We can give new life to any bearing up to 26.25' (8m) in diameter, regardless of design, configuration, or original manufacturer.

Bearings remanufactured by Kaydon meet or exceed OEM specs and come with a full one-year warranty, just like a new bearing. Yet they cost much less than new OEM bearings and can usually be delivered much faster.

At Kaydon, remanufacturing is not a sideline... it's a dedicated program with its own personnel, equipment and inventory. For details, please see the next page.

For big savings on remanufactured bearings with no trade-off in quality or performance, call Kaydon Bearings today.

A dedicated remanufacturing program

The Kaydon remanufacturing program gives worn bearings new life at big savings vs. new bearings, regardless of the original manufacturer. (One example: a bearing repaired for a major U.S. mine operator just passed its 35,000-hour check-up and is still going strong.) Program highlights include:

1. Free inspection on slewing ring bearings up to 8' in diameter
2. Inspection in one week or less
3. Non-destructive testing performed on all bearings
4. Engineering analysis
5. Formal analysis reports provided for all inspections
6. Four-week turnaround for bearings 8' and under, and just a few more weeks for bearings 8' to 26.25'
7. Substantial savings versus the price of a new replacement bearing
8. Emergency remanufacturing services
9. One-year warranty for all remanufactured bearings
